

RICHARD NZEMBE

Software Developer | AI & Educational Technology | Zimbabwe

Email: nzemberichard398@gmail.com | Phone: +263 779 019 896

GitHub: github.com/Richardnzembe

PROFILE

Software developer focused on practical tools for business operations, student productivity and everyday needs. Builds web and Android applications and explores AI integration through hands-on projects.

SELECTED PROJECTS

NotesAI-RNA — AI-assisted student workspace

Built a study application for notes, tasks and AI-assisted learning. Technologies: React, Vite, Django and AI integration.

RIVET — Retail Ledger

Developed a retail operations application for cashier shifts, cash movements, shortages, overages and reconciliation reporting. Technologies: React, Vite and Supabase.

Airtime Scanner — Android application

Created an offline OCR-based tool to scan airtime recharge vouchers and reduce manual PIN entry. Includes dual-SIM selection and a recharge workflow.

RIVET Software Manager — related administration system

Built a separate application for subscription and billing administration for RIVET.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, SQL | **Frontend:** HTML, CSS, React, Vite

Backend & data: Flask, Django, Node.js, SQLite, Supabase

Tools & interests: Git, GitHub, progressive web apps, AI integration

EDUCATION & CERTIFICATION

Professional Certificate in Computer Science for Artificial Intelligence

Harvard University (HarvardX), in collaboration with edX | Issued August 2026

Certificate ID: efb518ae9ba44b75ae0ab0e38a945969

Computer Science undergraduate coursework

University of the People - previous study.
